INTRODUCTION

Christmas time back in 1929 we made a photo greetings card for our friends. It portrayed the seven members of our Jaques family standing on the front steps of our home at 707 North Main Street. Jean was not yet in school. The others were in the grades.

For each Christmas that followed we tried to reveal some of the whereabouts and activities of our family as marriages and grandchildren enlarged the group. Occasionally friends tell us they have the entire series and look forward to each new card from year to year.

Already the 1956 little book is out of date, so it gives us much pleasure to present you with this second revision of "HOW TO KNOW THE JAQUES FAMILY." It imitates our Pictured-Key Nature Books (see pp. 2 and 45). The cover design, with faces of the 18 grandchildren, takes the form of the new pattern being used for the paper covered editions of our Nature books. Who else but Martha could have drawn such lifelike heads!

More faces call for a larger booklet; then we are adding something of the more recent activities of each group and some interesting things that they have done.

We are indebted to our children and grandchildren (now 27 of them in all) for their help in many ways. Our heartiest thanks likewise goes to Wm. C. Brown Company for painstaking care in giving this new booklet a master touch of elegance.

And now, speaking for our rather widely scattered tribe, we are wishing YOU, one and all wherever you are, a MOST JOYOUS HOLIDAY SEASON.

Mount Pleasant, Iowa
December 25, 1960

HOW TO KNOW THE JAKES FAMILY

707 NORTH MAIN

This is the place where our children grew up and where the grandparents now live. H. E. with his then—four children and a housekeeper, moved into it in the spring of 1923. It has seen many happy moments and its share of sorrows, too. It adjoins the Harlan-Lincoln Home which is being restored. Our residence overlooks Iowa Wesleyan's new Hall of Science, now under construction.

HOW TO KNOW THE JAKUES FAMILY

The H. E. JAKUES'S **707 North Main, Mt. Pleasant, Iowa**

The H. E. Jaques's and their children and grandchildren constitute the "Jaques Family" about which this booklet is written. The Grandparents are comfortably housed at 707 North Main. The house is much too big for the old folks until such times as when the others come for a visit. Then it is all put to use and an overflow in a near-by motel sometimes engaged.

Fig. 8. The Jaques Family the best they could be corralled that July 24th. Nick could not leave the National Audubon Camp he supervises in Wisconsin. Billy was in Colorado attending the International Boy Scout Jamboree and in the heat of the action no one thought to take Grandma from her work long enough for the picture.

The little Gc's have listened to tall tales from "Mama" about what I did "when I was a little girl" so want to play in the attic or on the stairs and bannisters, or race around the yard catching insects. All of the Gc's are interested in the Out-of-Doors and in making collections and otherwise studying plants and animals.

HOW TO KNOW THE JAQUES FAMILY

The Grandparents have spent a good part of their recent years travelling and in the South for the winters. They will likely stay in Mt. Pleasant this year; the building of the long-dreamed-of Science Hall, less than a block from their windows, is too good a sight to leave.

GRANDPA'S BIRTHDAY

No one seems to know just when Grandmother Jaques first thought of it, but she had been planning for months to get the children and grandchildren all home for Grandfather Jaques's eightieth birthday July 24, 1960 and to invite a lot of his friends to drop in to an open house that Sunday afternoon.

The day dawned brightly. It took three long pews to hold the Jaques family and several visiting relatives at church that morning. Then to Harlan Hotel where 41 ate dinner together in the Lincoln Room.

Figure 9. H. E. and Winifred Jaques with the cake.

HOW TO KNOW THE JAKES FAMILY

At 707 North Main a huge cake (Fig. 9) in replica of "Old Main" building on Iowa Wesleyan's campus, surrounded by individual cakes and mints, (each marked with a purple "80"), candles, nuts, punch bowls and such filled the dining room table and awaited the afternoon callers. The decoration colors were those of the college, purple and white. The figures 1907-1960, were on top of the cake to represent the years Professor Jakes had taught classes in Old Main and had been otherwise connected with that building. The house overflowed with the callers,—relatives, former students and friends—many of them from a distance. Nick and Billy were the only members of the family who were prevented from coming. It was a wonderful day for the grandparents.

Fig. 10. Martha, Friski and Jean supervised the picnic supper Saturday evening with 16 grandchildren present. It was the first time all these cousins had eaten together.

HOW TO KNOW THE JAQUES FAMILY

1a Hair graying and still thinner; works late and sleeps late. Fig. 11.

HARRY EDWIN JAQUES (H. E., PROF. or GRANDPA)

Figure 11

BIRTHDAY: July 24, 1880.

HEIGHT: 5 ft, 8 in. WEIGHT: 132 lbs.

HAIR: Gray (the little that's left).

EYES: Gray-blue.

WORK: Editor and Author Pictured-Key Nature Books; Professor of Biology Emeritus, Iowa Wesleyan College.

HOBBIES: Color photography; travel; Nature; stamps.

H. E. Jaques was born and grew up at Danville, Iowa. He was in business in Burlington three years after graduating from business college and taught public school six years. He joined the faculty of Iowa Wesleyan College in 1907 and was made Head of the Biology Department in 1912 and Professor Emeritus in 1947. He is a member of several science organizations and has published numerous papers on biological subjects.

At the college he organized the Iowa Insect Survey, a seasonal and geographic distribution study of the Insects of Iowa and used it in teaching systematic entomology. Under his direction the survey collection was built to where it contained over 7,000 species and 300,000 specimens of Iowa insects. This collection is widely known and rather frequently used by specialists.

His most outstanding contribution to science is the Pictured-Key Nature Books (see pp. 2, 45) which in recent years takes much of his time. He is the author of nine of these books and secures authors for the other titles and edits, proofreads and otherwise guides these manuscripts through their production or revision. Thirteen outstanding biologists have written the remainder of the now-22 Nature books. These books are well known and widely used. Several new titles are in preparation.

HOW TO KNOW THE JAKUES FAMILY

1b Hair white; has many friends. Fig. 12.

WINIFRED BRANT JAKUES ("GRANDMA")

BIRTHDAY: March 23, 1893.

HEIGHT: 5 ft. 4½ in.

HAIR: White. EYES: Brown.

WORK: Homemaker; helps with Pictured-Key books.

HOBBIES: Lichens; birds; travel; color photography.

Figure 12

Winifred joined the Jaques Family August 29, 1954 and was immediately taken to the hearts of the grandchildren and the others. She's a busy housekeeper, excellent cook and grand companion whether travelling or at home. Her experiences as housemother of fraternity men opens pleasant relationships with students of our campus. She helps with many of our projects and gives especially valuable aid with checking, proofreading, and other work with our books.

One of Grandmother Jaques's hobbies is collecting dolls. Her collection contains well over 100 dolls from widely scattered regions (Fig. 13). Many of them she has bought on our trips; some have been gifts. They make an attractive and highly interesting display.

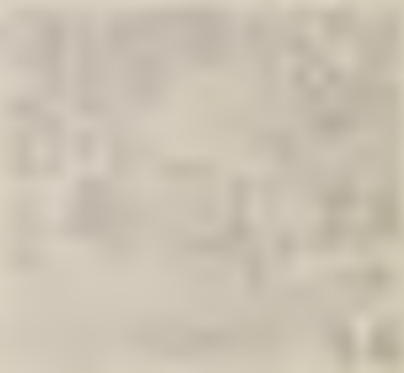

Figure 13. Part of the doll collection.

HOW TO KNOW THE JAQUES FAMILY

The **NICHOLAS L. CUTHBERT'S** Route 3, Mt. Pleasant, Michigan

Figure 15. The Three Cuthberts.

Here is a family of naturalists; all three are deeply interested in the Outdoors and gladly spend much time in it. Their home, which they built only a few years ago has Nature running wild on all sides. It is located on a half-wooded forty acres and sets in a bend of the Chippewa river. Two all-glass sides of the combined living room and dining space overlook the nearby river which frequently displays a procession of wild life. They have spent their past four summers at the National Audubon Camp near Sarona, Wisconsin, one of four National camps, where Nick was director, Mabel hostess and instructor and Frances in the thick of much of it.

Their weeks vacation last summer was spent most pleasantly on Isle Royal. The 1958 Holiday Season found them vacationing in Florida and 1959 in Colorado mountain climbing, etc.

HOW TO KNOW THE JAKES FAMILY

- 1a The parents 2
1b The daughter. Fig. 16.

Figure 16

FRANCESCA JEAN CUTHBERT (FRANCIE)

BIRTHDAY: June 29, 1946.

HEIGHT: 5 ft. 9 in. WEIGHT: 140 lbs.

HAIR: Medium brown. EYES: Pansy blue.

WORK: School, ninth grade; house work.

HOBBIES: Agates; swimming; nature study; knitting; band (clarinet).

Francie is very much an outdoor girl both in her love of plants and animals and of sports. Swimming, water skiing, boating, horseback riding all appeal to her and she does them well. She has a good knowledge and interest in mammals and has a fine collection of skins which she has made. Many of her choice specimens have been garnered from the highway casualties on family trips. Some of these beautiful skins bear stories of Francie's sitting up for hours after all others had turned in, to faithfully prepare her smelly prize.

- 2a An authoress, botanist and artist; very pleasant to meet. Fig. 17.

Figure 17

MABEL J. CUTHBERT (MAB.)

BIRTHDAY: April 13, 1915.

HEIGHT: 5 ft. 6 in. WEIGHT: 120 lbs.

HAIR: Medium blond, graying.

EYES: Blue.

WORK: Homemaker; writing books; studying plants and drawing them; Visiting Instructor, Central Michigan University.

HOBBIES: Reading; sewing; conservation; Audubon society; politics.

HOW TO KNOW THE JAQUES FAMILY

Mabel's manuals for identifying Spring Flowers and Fall Flowers are widely used. Her "How to Know the Summer Flowers" is in preparation. She uses all this knowledge of plants and other living things with her classes and field work at summer camp and at the University. She is deeply interested in the work of the Audubon Society and for years has promoted the Audubon Screen Tours in her home town with marked success.

She is a skilled artist and has made many drawings of plants for publication. In September she had two all-day field trips at Gladwin, Michigan for teachers of that surrounding area, as a part of the extension course in Nature Study which she teaches for the University.

2b A teacher and research man: always working. Fig. 18.

NICHOLAS L. CUTHBERT (NICK)

BIRTHDAY: March 25, 1914.

HEIGHT: 5 ft. 11 in. **WEIGHT:** 160 lbs.

HAIR: Dark brown. **EYES:** Dark blue.

WORK: Professor of Biology, Central Michigan University; Investigator Water Birds.

HOBBIES: Bird study; grading papers.

REMARKS: Ph.D. (Genetics) University of Wisconsin.

Figure 18

Nick is a devoted and thoroughly trained biologist with particular attention in Ornithology, Genetics and Taxidermy. This with his good nature makes him a favorite teacher, and enthusiastic in leading field trips. Central Michigan University, where he teaches, now has more than five thousand students which throws a heavy load on the Biology Department.

He has published a good number of important scientific papers as a result of his research.

HOW TO KNOW THE JAQUES FAMILY

The LAURENCE K. CUTKOMP'S
2358 Bourne Ave., St. Paul 8, Minn.

Figure 19. The six Cutkomp's.

The Cutkomp's have lived at this address for a good number of years. They are a rather closely knit family and do many things together. They are happy in the Outdoors and recognize many of its creatures. The children have much of the skill in drawing and in ceramics that their mother possesses. Last summer they had a week of vacation at Little Pelican, near Brainerd, where swimming, fishing, playing tennis, hiking, etc., occupied their days.

They work together on making posters and on various school projects. The nursery school which the older girls have organized and have held classes for five mornings a week for two summers, is popular with neighborhood children and their mothers. They have devised many unique things for the children to do.

HOW TO KNOW THE JAQUES FAMILY

The seventh annual craft fair and sale of the Community Interest Center held in the branch library of St. Anthony Park in October featured ceramics by the Cutkomps. Martha displayed different types of pottery ware such as bowl, mugs, planters, vases and coin banks. The three girls concentrated on storyland characters, scenes and animals. Their ceramic menagerie included bears, donkeys, elephants, squirrels and other animals.

"Getting ready for the Craft Fair are Kay, Lee and Terry Cutkomp, ceramic specialists." This photo and the paragraph above from the St. Paul Dispatch Oct. 25, 1960.

HOW TO KNOW THE JAQUES FAMILY

2a The Father: a well known entomologist; hair gray. Fig. 20.

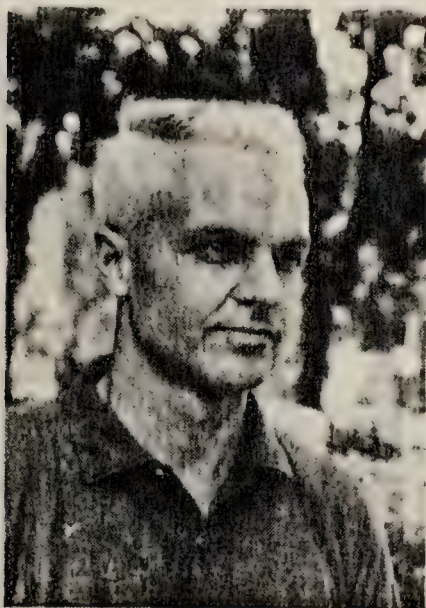

Figure 20

LAURENCE K. CUTKOMP (LARRY)

BIRTHDAY: January 24, 1916.

HEIGHT: 5 ft. 9 in. **WEIGHT:** 145 lbs.

HAIR: Gray. **EYES:** Deep brown.

WORK: Professor, Division of Entomology and Economic Zoology, University of Minnesota.

HOBBIES: Bowling, photography, hand ball.

REMARKS: Ph.D. (Entomology) Cornell University.

The University of Minnesota advanced Doctor Cutkomp from Associate Professor to Professor in July 1960. He has had much experience in field work for insect control where large projects were involved and has been often engaged as a consultant.

Larry may usually be seen at the important entomological meetings. He is now Chairman-elect of the North Central Branch of the Entomological Society of America. He also holds membership in Sigma Xi, AAAS and the Science Club of the University of Minnesota.

His publications in 1960 included (1) "Insecticides and their use in Minnesota," (2) "Reproduction following insecticidal treatment in two resistant strains of house flies" and (3) "The relationship between density and mortality of flour beetles exposed to insecticidal treated surfaces."

He is active in civic affairs and in church and Sunday school.

THE HISTORY OF THE UNITED STATES

OF THE UNITED STATES OF AMERICA

The history of the United States is a story of a people who have grown from a small colony of settlers to a great nation. The story begins with the first settlers who came to the New World in search of a better life. They found a land of opportunity and freedom, and they built a new society based on the principles of liberty and justice for all.

THE HISTORY OF THE UNITED STATES

HOW TO KNOW THE JAQUES FAMILY

2b Hair dark, not gray; very active. Fig. 21.

KENT JAQUES CUTKOMP (KENT)

BIRTHDAY: September 27, 1948.

HEIGHT: 4 ft. 7 in. **WEIGHT:** 71 lbs.

HAIR: Brown. **EYES:** Dark brown.

WORK: School, seventh grade.

HOBBIES: Coordinating facts from Census reports, Almanacs and Encyclopedias; Baseball.

Figure 21

Kent is a wide-awake, energetic young fellow who has many interests. He does his school work well; then goes a second mile on projects of his own. Now he is finding atlases and maps of especial interest. He is a collector in several fields;—coins, ticket stubs, model cars, etc.

He likes Scouting and has had some successful gardening projects. He participated in two paper drives for the Boy Scouts, and is employed in distributing advertising literature.

The past summer he played on the Saint Anthony Park "Saints" baseball team, sometimes at shortstop, other times at second base. His team won eleven games and lost ten.

HOW TO KNOW THE JAQUES FAMILY

3a The daughters.....4

3b The mother; a very busy woman. Fig. 22.

Figure 22

MARTHA W. CUTKOMP (MARTHA)

BIRTHDAY: January 26, 1917.

HEIGHT: 5 ft. 4½ in. **WEIGHT:** 125 lbs.

HAIR: Brown. **EYES:** Hazel.

WORK: Homemaking; doing and teaching ceramics; illustrating.

HOBBIES: Tending her greenhouse; gardening with flowers and vegetables.

Martha is a talented young woman with many friends and very much interested in the welfare of her family. Her art training has overflowed on her children, much evidence of which is seen throughout their home. Her originality and skill with ceramics is outstanding. Figurines of many subjects, dishes, vases,—whatever seems to come to her mind, is done in unique style and design. One of her recent designs which is proving quite popular is an owl, sitting erect. The solemn-faced head may be rotated or removed to empty the bank.

She is an active member of PTA and much interested in the betterment of the schools. She is highly skilled as an illustrator. She refinishes furniture and raises many varieties of plants in her greenhouse and garden. She says she's been "finding out what makes people and plants grow; it's attention and loving care."

HOW TO KNOW THE JAQUES FAMILY

- 4a In the grades.....5
 4b In high school. Fig. 23.

Figure 23

KAY FRANCINE CUTKOMP (KAY)

BIRTHDAY: December 9, 1944.
 HEIGHT: 5 ft. 3 in. WEIGHT:
 101 lbs.
 HAIR: Dark brown. EYES:
 Brown.
 WORK: School, eleventh grade;
 piano.
 HOBBIES: Ceramics; collecting
 shells; painting; gardening;
 piano.

This junior at Murray High school is our oldest grandchild. She's a good student and a most enthusiastic supporter of her school. She has belonged to the following organizations:—Girls' Athletic Association, Future Teachers Association, Russian Club, Co-Pilots, Spanish Club. She's a strong supporter of the Murray Football team and feels that the local papers do not give her school the coverage they deserve.

• Perhaps her most outstanding skill is in clay modeling. For last Christmas she made "The Twelve Days Of Christmas" in highly glazed and colored ceramic figures for the Grandparents. Our picture (Fig. 24) of these twelve little figures does not begin to do them justice, for they display excellent art and an unusual degree of perseverance.

HOW TO KNOW THE JAQUES FAMILY

Besides all this, Kay is a good cook, makes some of her own clothes and is learning to drive a car.

THE TWELVE DAYS OF CHRISTMAS

HOW TO KNOW THE JAKUES FAMILY

5a Over 5 feet tall. Fig. 25.

Figure 25

TERRY ANNE CUTKOMP (TERRY)

BIRTHDAY: January 27, 1947.

HEIGHT: 5 ft. 3 in. **WEIGHT:** 110 lbs.

HAIR: Blond. **EYES:** Blue.

WORK: School, eighth grade; house work.

HOBBIES: Piano; making doll clothes; imitating.

Terry is a good organizer in whatever she undertakes; her school work is neatly arranged and well done; she can clean a room and set things at rights quickly and in a most satisfying way. At school she is a member of the Girl Scouts and of the Russia Club, which she started. The seven members meet at her home and use records with their language lessons.

Terry and Kay do many things together. They have a joint bank account and have had comparatively few quarrels over the spending. They are generous with their money,—often spending it for the family. They collect dimes and have most of the dates represented; the duplicates are also "collected" until they have an owl bank almost filled. They organized the summer nursery school for neighborhood kids and operated it five days per week.

HOW TO KNOW THE JAKUES FAMILY

5b Less than 5 feet tall. Fig. 26.

NARDA LEE CUTKOMP (LEE)

BIRTHDAY: April 16, 1953.

HEIGHT: 4 ft. **WEIGHT:** 52 lbs.

HAIR: Blond. **EYES:** Hazel.

WORK: School, second grade; helping mother.

HOBBIES: Gardening; cooking.

Figure 26

Lee is a quiet little gal who can readily entertain herself. Her kittens, her garden, her rock collection all figure in her enjoyment. She shares in the family skill in pottery: some of her creations are excellently done. She likes to straighten drawers and often makes pleasant "surprises" for some one who needs cheering up.

She is a member of the Bluebirds and has many interesting experiences at school. Her dream of a real achievement is to invent invisible windshield wipers.

HOW TO KNOW THE JAKUES FAMILY

The WILLIAM G. JAKUES'S
1529 Merle Hay Road, Des Moines 11, Iowa

Fig. 27. The nine Jaques's.

Family unity is a great theme and is enthusiastically promoted by this group. Both parents take time for many activities with their children. The annual canoe trip is typical. This year Robert, Jeff and Josie were left at home while two canoes carried Bill, Gerry and the four older boys for three days leisurely down the Des Moines river. Stops were made along shore for exploring, fishing, outdoor cooking and for tenting over night.

At other times Bill takes the boys to the Ledges or some other state park where they all share in setting up their tents and other camp equipment and in getting the meals, in fishing and in exploring the Nature trails. Outdoor activities hold high favor, with emphasis on collecting,—tadpoles, rocks, buckeyes, just whatever is in season. It offers good opportunity to promote conservation. Picnics bring all out to savor the flavor of outdoor cooking. Bill still has a few recruits for model building instruction; then there are two or three who would rather read than eat.

HOW TO KNOW THE JAQUES FAMILY

1a The two use one birthday cake. Fig. 28....2

1b Can't do as in 1a.....3

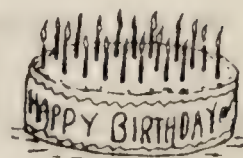

Figure 28

2a Tall and slender; keeps the home ship on an even keel. Fig. 29.

Figure 29

GERALDINE E. JAQUES (GERRY)

BIRTHDAY: December 5, 1920.

HEIGHT: 5 ft. 7 in. WEIGHT: 125 lbs.

HAIR: Brown. EYES: Blue-green.

WORK: Homemaker (and tops at it).

HOBBIES: Reading.

Gerry is a very busy mother, with six boys in school and one female apprentice at home. She seems always to have time to whip up a batch of cookies, mend the sox, fix a skinned knee or settle an argument. P.T.A., Church activities, Cub Scouts and Scout work plus a bridge club and a small circle of close friends keep her busy and entertained.

She is a woman of sterling character and high purpose in her life. How fortunate that she was serving as secretary in the office of a large munitions construction project when Bill was transferred there to join the engineering staff! Maybe the common birthday started it all.

Her willingness to maintain their modest home while Bill was still in engineering school and her good help with their business now, has been important.

HOW TO KNOW THE JAKUES FAMILY

2b Very tall; works hard and long; pleasant to meet. Fig. 30.

Figure 30

WILLIAM G. JAKUES (BILL)

BIRTHDAY: December 5, 1919.

HEIGHT: 6 ft. 1½ in. WEIGHT: 150 lbs.

HAIR: Sparce. EYES: Gray.

WORK: Engineer and General Contractor; foundation specialist.

HOBBIES: Hunting and fishing.

From his early days, Bill had two marked interests,—building and outdoor life. He went frequently with his Dad on collecting trips and was most helpful; the U. S. National Museum and other large insect collections have many specimens bearing his name as collector. Saturdays and summer vacations through high school he worked in a lumber yard and on construction. He interrupted his college work to get experience in heavy construction and later to serve in the "Sea-Bees" in Africa. With the war over he went back to finish engineering school. After serving as engineer with other companies he organized his own corporation and has an expanding business, specializing in Mud jacking, Foundation stabilization, Pressure grouting and Raising heavy structures.

With it all he still takes time to teach his boys how to be useful citizens and thoroughly enjoys watching their progress as they grow.

HOW TO KNOW THE JAQUES FAMILY

3a Boys 4

3b A little daughter. Fig. 31.

JOSEPHINE FRANCESCA JAQUES (JOSIE)

BIRTHDAY: January 29, 1959.

HEIGHT: 33 in. WEIGHT: 26 lbs.

EYES: Blue.

WORK: Block-scatterer and beater-licker.

HOBBIES: New words and Hobby-horse riding.

Figure 31

In her home, Josephine is a real novelty. She's a sweet, saucy little minx surrounded by six (probably eight) willing slaves. Is learning to talk well, loves music and delights in at least tearing the covers off books. She is quite an accomplished hobby-horse equestrienne!

With six older brothers to stand up for her, the neighborhood kids will need to treat her right.

HOW TO KNOW THE JAQUES FAMILY

4a (a, b, c) In the grades.....5

4b In high school. Fig. 32.

WILLIAM BENEDICT JAQUES (BILLY)

BIRTHDAY: April 2, 1946.

HEIGHT: 5 ft. 9 in.

WEIGHT: 115 lbs.

HAIR: Brown. EYES: Gray.

WORK: School, ninth grade; paper route; anything to make an honest dollar.

HOBBIES: Reading, Scouting, sports, hunting, fishing, stamps, coins and records.

There doesn't seem to be enough time in any given day for young Bill. He works hard in school and is a good student. This past summer was a real knockout for him. He was star pitcher on his Pony League baseball team, pitched one no-hit game, another allowing but one run and led the team to the championship of the league. He made the All Stars but was unable to go because he went to the Boy Scout Jamboree in Colorado Springs.

Figure 32

CLINICAL OBSERVATIONS ON THE EFFECTS OF THE NEW HYPOPHOSPHITES

THE NEW HYPOPHOSPHITES, which are the only ones of their kind, have been found to be effective in the treatment of certain types of anemia. They are also found to be effective in the treatment of certain types of leukopenia. The new hypophosphites are the only ones of their kind which are effective in the treatment of certain types of anemia and leukopenia. They are also found to be effective in the treatment of certain types of anemia and leukopenia.

Figure 33

JEFFREY JOHN JAQUES (JEFF)

BIRTHDAY: October 2, 1955.

HEIGHT: 3 ft. 7½ in.

WEIGHT: 40 lbs.

HAIR: Brown.

EYES: Dark blue.

WORK: Kindergarten.

HOBBIES: Tricycle riding, swimming in the wading pool and camping with the big boys.

Jeffrey is the last of the boys but by no means the least and upon occasion can make his brothers step around. He's a very tender little fellow for the most part, however, and is dearly loved. The tricycle is his favorite toy and the sand pile and tree house his special haunts.

HOW TO KNOW THE JAQUES FAMILY

This congenial young fellow has an uncanny knack of making friends wherever he goes. He keeps himself busy with mechanical things. He loves to swim and to play rugged games. He has a paper route and does a commendable job with it. He is highly skilled in constructing models. Some of his inventions are unique.

6b A rock collector. Fig. 35.

MICHAEL AUSTIN JAQUES (MIKE)

BIRTHDAY: June 23, 1951.

HEIGHT: 4 ft. 4 in.

WEIGHT: 50 lbs.

HAIR: Blonde.

EYES: Hazel-gray.

WORK: School, fourth grade.

HOBBIES: Rock collecting, gardening, apprentice baker, Scouting and fishing.

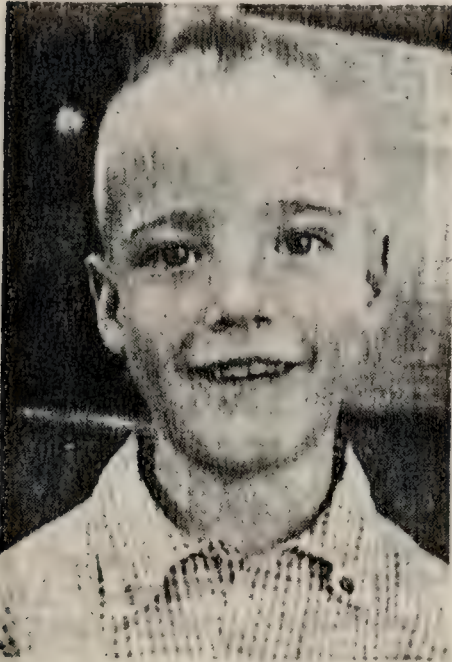

Figure 35

Young Michael is quite a thoughtful young fellow. He is very considerate of others and is like a little mother to his baby sister. He likes to putter around in his garden, ride his bicycle and participate in winter sports.

Mike seems to have an amazing amount of energy, is a quick thinker and may be found in the midst of much that is going on. His rock collection is an important interest for him.

HOW TO KNOW THE JAQUES FAMILY

7a An enthusiastic entomologist. Fig. 36.

ROBERT PATRICK JAQUES (ROBBIE)

BIRTHDAY: June 12, 1954.

HEIGHT: 4 ft. 1 in.

WEIGHT: 48 lbs.

HAIR: Blonde.

EYES: Dark blue.

WORK: School, second grade.

HOBBIES: Insects, creative activity
and camping.

Figure 36

This little boy seems to have inherited his grandfather's interest in the Outdoors and is constantly finding additions for his collections. He can handle butterflies in a most remarkable way for one of his age and recognizes different species.

Robbie has a delightful disposition and a tremendous voice for such a little fellow. He is a good camper, likes school very much and makes friends easily.

Robert and Winifred joined our family the same year so Gerry says "He's Grandma's boy."

HOW TO KNOW THE JAQUES FAMILY

7b Interested in sports. Fig. 37.

TIMOTHY EUGENE JAQUES (TIM)

BIRTHDAY: June 20, 1952.

HEIGHT: 4 ft. 3 in.

WEIGHT: 55 lbs.

HAIR: Blonde.

EYES: Dark blue.

WORK: School, third grade.

HOBBIES: Models, baseball, swimming and camping.

Figure 37

This active young fellow keeps things well stirred up most every place he goes and is the dare-devil of the group. He gets along well with other members of his family, has a very active imagination, enjoys bicycling, swimming and camping in the back yard. He is just beginning to enjoy the magic of a book.

HOW TO KNOW THE JAQUES FAMILY

The RICHARD D. STONER'S Hawkins Lane, Brookhaven, L. I., N. Y.

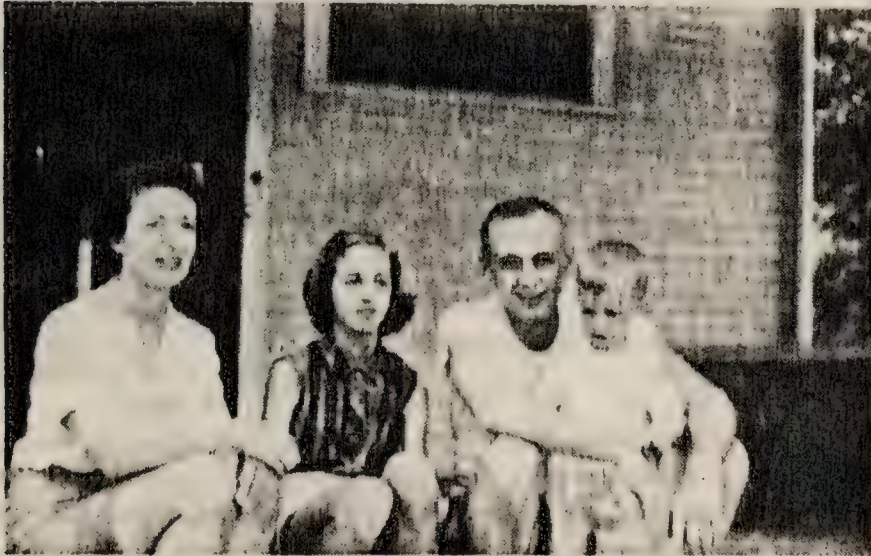

Figure 38. The Four Stoners.

Dick says "The most exciting activity for our family this year was to watch the construction of our new home.

After months of delay we acquired title to our property in Brookhaven on the south shore of Long Island. We started to build the last week in May and moved into our home August 30th.

The high spot of the summer was a trip to Iowa to be with H. E. J. for his 80th birthday. It was most enjoyable to see all the gang together again."

2a The researcher. Fig. 40.

Figure 40

RICHARD D. STONER (DICK)

BIRTHDAY: March 29, 1919.

HEIGHT: 6 ft. 1½ in. WEIGHT: 155 lbs.

HAIR: Medium light. EYES: Brown.

WORK: Microbiologist, Medical Research Center, Brookhaven National Laboratory, Upton, L.I., N.Y.; viruses.

HOBBIES: Woodworking; archery; leather work; color photography.

REMARKS: Ph.D. (Parasitology) State University of Iowa

1969337

Doctor Stoner's days are filled at the Laboratory with research on effects of radiation on immunity and susceptibility to infectious diseases, and with radioisotope work with worms and antibodies.

In the summer of 1958 he lectured before the VIIIth International Microbiology Congress which was held in Stockholm, Sweden, title "The Effects of Chronic Cobalt-60 Gamma Radiation on Tetanus Antitoxin Production" and also lectured and visited laboratories and universities in Denmark, The Netherlands, England and Scotland. In April, 1960, he lectured in San Francisco before the Radiotron Research Society, title: "Comparative Radiosensitivity of the Primary and Secondary Antibody Responses."

In September, 1960, he responded to an invitation from the Polish Parasitological Society to give two lectures at the First International Conference on Trichinosis. The meetings were held in Warsaw in the Palace of Culture and Science. 103 delegates representing 23 countries attended. Simultaneous translations of the papers and discussions were done in Polish, Russian and English. Following this conference, Dick visited laboratories and universities in Switzerland, The Netherlands and England.

THE HISTORY OF THE UNITED STATES

The history of the United States is a story of growth and change. It begins with the first settlers who came to this land in search of a new home. They found a land of great beauty and potential, but also one of great challenges. The early years were marked by struggle and hardship, but the spirit of the pioneers was strong. They built a nation that would stand the test of time.

CHAPTER I

The first chapter of the history of the United States is the story of the early settlers. They came to this land in search of a new home, and they found a land of great beauty and potential. The early years were marked by struggle and hardship, but the spirit of the pioneers was strong. They built a nation that would stand the test of time. The story of the United States is a story of growth and change, and it is a story that continues to this day.

HOW TO KNOW THE JAQUES FAMILY

2b The homemaker. Fig. 41.

FRANCESCA J. STONER (FRISKI)

BIRTHDAY: March 25, 1922.

HEIGHT: 5 ft. 4 in. WEIGHT: 116 lbs.

HAIR: Brown. EYES: Deep blue.

WORK: Homemaking.

HOBBIES: Reading; interior decorating;
trying new exotic recipes; garden-
ing; bridge.

Figure 41

Due to delays in getting title to the land for the new home, the Stoners distinguished themselves by moving two times in three months. Frisk handled all the details with the moving-van company. The others are highly impressed with what this meant to them. Much of the planning of the new house and its decorating has been her work. Back at Bellport she was chairman of the Girl Scout Finance Drive.

Francesca's skill as a Nature artist may be seen in several of our Pictured-Key books. Her help in this way has been a life saver for us repeatedly.

HOW TO KNOW THE JAQUES FAMILY

3a The teen-age daughter. Fig. 42.

BETTINA ANN STONER (TINA)

BIRTHDAY: August 31, 1947.

HEIGHT: 5 ft. 2½ in.

WEIGHT: 80 lbs.

HAIR: Brown.

EYES: Blue.

WORK: School, eighth grade; "little brother sitting."

HOBBIES: Riding horses; collecting model horses; designing and sewing doll clothes.

Figure 42

Tina is a delightfully fine girl who has many friends. She reads a great deal and draws excellently. For years she has been highly interested in horses and has long had a collection of toy horses. Last summer she got to attend the National Horse Show in Madison Square Garden. That was a red-letter day for her. She is a member of the Girl Scouts and takes an active part. During the summer she camped in the woods several times with her Scout friends.

Tina enjoys music and is a member of her school chorus. Her visit with her cousins at Mt. Pleasant in July was much too short.

HOW TO KNOW THE JAQUES FAMILY

3b The active little brother. Fig. 43.

SCOTT JAQUES STONER (SCOTT)

BIRTHDAY: June 2, 1957.

HEIGHT: 2 ft. 11 in.

WEIGHT: 27 lbs.

HAIR: Light brown.

EYES: Blue.

WORK: Helping Daddy "fix" things.

HOBBIES: Playing with his trucks, tractors and bulldozers, collecting all kinds of "treasures"; sticks, stones, bugs and leaves.

Figure 43

Scott and his cousin Candy were first pictured for our Christmas friends three years ago. He is a keen-witted little fellow who has already acquired much knowledge and skill from his close observations. Many of his midday hours are spent with his mother who answers his questions and patiently explains to him. Presently his Dad comes home and Scott's apprenticeship as a mechanic takes over. He knows all the tools by name, where they are kept and for the most part how they should be used. The head master consults him enough to give him a real interest in their project.

Scott was the cheeriest traveller of all to Iowa and return last summer. He is interested in outdoor life, especially insects, and likes to investigate them. With his father so readily available, Scott should make an outstanding Atomic Scientist.

HOW TO KNOW THE JAQUES FAMILY

THE JEAN L. SHOCKLEY'S P. O. Box 86, Kayenta, Arizona

Fig. 44. The five Shockleys

The Shockley's moved from Independence, Iowa to Mt. Pleasant at the close of school in 1957. The three girls attended Harlan school for two years while their mother was finishing her work at Iowa Wesleyan. In the summer of 1959 they visited friends and relatives on their way out to Kayenta, Arizona where Jean had been engaged to teach in a Federal Navaho school. The girls enjoyed their work in the public school at Kayenta, and had an eventful year.

The last of June, 1960, Jean and the girls drove back to Mt. Pleasant to be here for Grandfather's birthday celebration and to visit their many friends and relatives in Iowa. On their return trip they enjoyed a stage coach ride in Dodge City and a visit to the zoo in Garden City. During their first year on the reservation they took expeditions into the surrounding country, collected rocks, learned some more Navaho words and made more Navaho friends. Once each six weeks, Jean made a 300 mile round trip to get groceries. A visit to Grand Canyon was greatly enjoyed. Now back for their second year at Kayenta, the girls have a new public school building, just finished.

HOW TO KNOW THE JAQUES FAMILY

- 1a The grandchildren.....2
1b Their mother. Fig. 45.

JEAN LOUISE SHOCKLEY (JEAN)

BIRTHDAY: January 1, 1927.

HEIGHT: 5 ft. 4½ in.

WEIGHT: 112 lbs.

HAIR: Light brown.

EYES: Blue.

WORK: Teaching in Navaho Boarding School (Federal), housekeeping.

HOBBIES: Reading, getting acquainted with the Indians and their country.

Figure 45

Jean has been characterized by her enthusiastic, hard work, and her interest in the less fortunate. In September, 1957, she re-entered Iowa Wesleyan College to continue her major in Biology. She was graduated in June, 1959, "cum laude" and with other honors. Her work as teacher in the Boarding School on the Navaho Reservation began in August, 1959. She was chosen as one of twelve teachers and supervisors from throughout the reservation who were sent, at the close of school, to a workshop held in Tohatchi, New Mexico. Their project was to make a manual for use of Navaho Beginners in aural-oral English, using the Freis Method. The manual was completed in four weeks and is now being tried in different schools and classes throughout the Reservation.

In August she attended a two-day session at Fort Wingate to decide how their aural-oral English manual was to be used. The new teachers of the Reservation were there for orientation. Meeting many of them and others from over the reservation whom she knew was enjoyable.

HOW TO KNOW THE JAKES FAMILY

2a In school.....3

2b Too young for school. Fig. 46.

CANDICE LEE SHOCKLEY (CANDY)

BIRTHDAY: July 4, 1957.

HEIGHT: 3 ft. 8 in.

WEIGHT: 32 lbs.

HAIR: Blonde.

EYES: Blue.

WORK: Tearing around; emptying trash.

HOBBIES: Animals of all kinds.

Figure 46

Candice seems to enjoy everything and everybody. She can play alone or with a group and apparently likes both. She likes cats, dogs, lizards and all species of toads and would take them to bed with her if allowed. She spends her day at the neighbors who keep her with other children her own age and is always anxious to go, for there is much to do. At home she keeps all the others busy as she finds so many things to examine.

Candy speaks some Navaho and occasionally mixes it with English so that her speech may be rather mottled. She is busy all her waking hours doing and trying.

HOW TO KNOW THE JAQUES FAMILY

3a Eyes brown (or hazel).....4

3b Eyes blue. Fig. 47.

Figure 47

JAQUELLA DEE SHOCKLEY (JACKIE)

BIRTHDAY: October 5, 1949.

HEIGHT: :4 ft. 10 in.

WEIGHT: 59 lbs.

HAIR: Blonde. EYES: Blue.

WORK: School, fifth grade; helping mother.

HOBBIES: Bicycling, basketball.

Jackie has learned the many things needed to keep a house going. She is the family baker and Candy's favorite playmate among older children. She is a proficient housekeeper and does a beautiful job of ironing. She likes to ride her bicycle out into the great blue yonder, of which they have great stretches. Her many friends are always floating in and out of the house. She is such a good sport that she makes a good friend to almost everyone.

Math. is her chief interest at school and at home it's baking. She helps the neighbor girl sell the only weekly paper that is sold in Kayenta. She is a member of the Mission Youth Group and she and some of the other girls have a club of their own.

She has won high honors in scholarship at her school.

HOW TO KNOW THE JAKES FAMILY

4a The quiet one of the girls. Fig. 48.

JANET KAY SHOCKLEY (JANET)

BIRTHDAY: January 4, 1951.

HEIGHT: 4 ft. 9½ in. **WEIGHT:** 62 lbs.

HAIR: Brown. **EYES:** Brown.

WORK: School, fourth grade, helping mother.

HOBBIES: Animals, games.

Figure 48

Janet is an animal lover. She drags home seemingly all of the toads, horned toads, other lizards and stray dogs and cats that are to be found, until presently even the animal loving mother has had too much, then there is a culling out, but it can and does all start over again. The little crawling things seem to be her especial favorites.

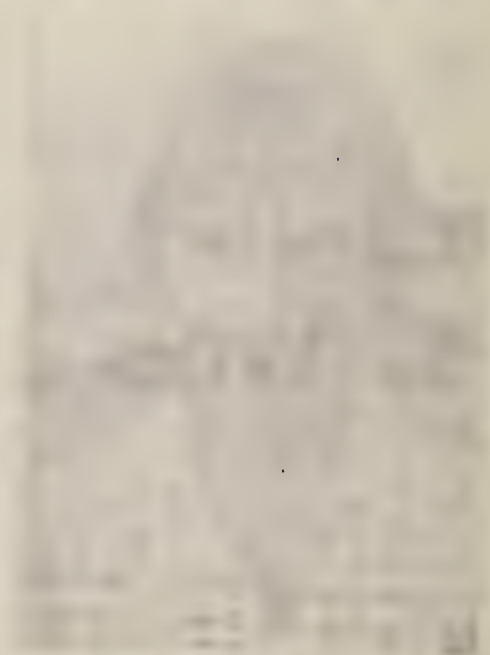

Janet is learning to help in the house and does a good job. She is fond of making models and painting and likes to help her mother grade her school papers. She enjoys bicycling and playing games of all kinds with the Indian children on the campus. She is already as large as Jackie and promises to become the tallest one of the Shockleys. She likes to hear older people talk and finds most of her friends among them. She also belongs to the Mission Youth Group but seems to prefer a few people to a gathering of many.

HOW TO KNOW THE JAQUES FAMILY

4b The oldest of the girls. Fig. 49.

CINDY DIANNE SHOCKLEY (CINDY)

BIRTHDAY: October 6, 1947.

HEIGHT: 5 ft. 3 in. **WEIGHT:** 83 lbs.

HAIR: Curly, brown. **EYES:** Hazel.

WORK: School, eighth grade; helping at home.

HOBBIES: Collecting horses; hiking; Indian lore.

Figure 49

Her mother says: "Cindy has been a great deal of help to us all. I question many times how much I could have done without her. She has taken responsibilities much beyond her years and done a remarkable job of it. She has learned to cook, do the washing, cleaning and much care of Candy, all like a veteran."

Cindy is interested in her school, does good work, writes an excellent hand and is loyal to their six-man football team and all other sports. She has made many Navaho friends and enjoys learning about their culture. She belongs to a young Mission Group which has a party once a week and offers entertainment for the children of Kayenta.

She is a busy girl, with her work at school and her work at home for she is definitely her mother's right hand man. She owns a cat which presents their home with kittens like clockwork and keeps the town of Kayenta well supplied.

HOW TO KNOW THE JAQUES FAMILY

OUR NATURE BOOKS

The Jaques name likely has its widest recognition in connection with the Jaques Pictured-Key Nature Books, now numbering twenty-two titles (see list on page 2), for they are widely used in schools, colleges, club work, etc.

Since this Christmas Greetings booklet imitates the style of the Pictured-Key books, it would seem that a bit of history of that Nature Series might well be in order.

In the late 1920's we began working on a book for identifying the beetles in which the key statements would be explained with drawings and each species identified in the book would be both pictured and described. Our students helped with numerous drawings.

Before that manuscript was completed a good friend challenged us to "write an insect book" which he would publish, and repeated the offer until we decided to accept it. Some of the introductory material was taken from the beetle book and made applicable for this "How To Know The Insects."

The pathway of an author is often filled with numerous obstructions. When the "Insects" manuscript was completed it finally seemed best to do our own publishing and selling. The Iowa Academy of Science had a fund for helping struggling authors. With aid of their loan, the first edition was printed (1936) and a modest promotion campaign started.

The illustrated-key idea seemed to meet a real need and suggested a series of nature books. By 1943 we had finished writing and had published four other Nature books in similar style and had adopted the name "Pictured-Key" for our Nature Series of books.

That same spring we published "How To Know The Spring Flowers" which our daughter Mabel had written and illustrated. Other books by "outside" authors followed until now thirteen different authors have thus contributed to the Pictured-Key Nature Series. We have contracts with several other authors who are now working on manuscripts to

HOW TO KNOW THE JAQUES FAMILY

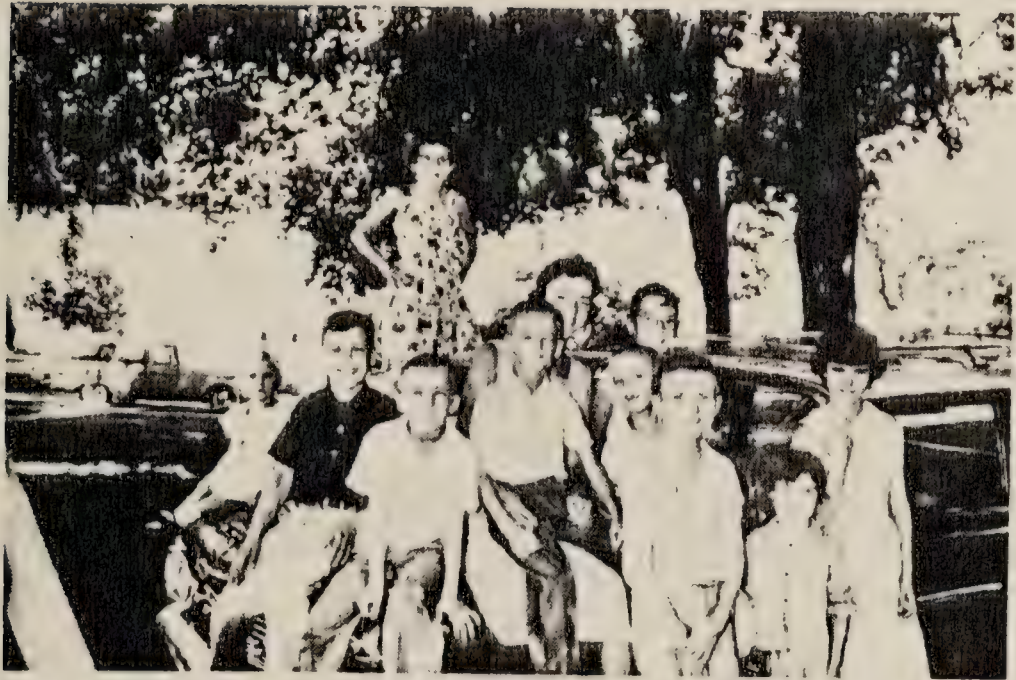

further expand the series. Our authors are authorities in their field; some are teachers, others research specialists, etc. Authors are needed for identification manuals in still other subjects. We are always happy to hear from one who has an urge to write such books.

Our success at selling and mailing out the books presently imposed a too heavy burden for 707 North Main. Accordingly the Wm. C. Brown Company on April 15, 1945 took over the publishing and selling, which left us free to give more time to other phases of the work.

A great number of friends have cheered us on and helped in innumerable ways. We shall mention only two although we are highly grateful to them all. Professor R. B. Wylie and Professor H. S. Conard, as members of the Iowa Academy committee, granted our starting loan and gave us much good advice. Doctor Conard also wrote our seventh book, "How To Know The Mosses," which was later revised and enlarged by including the Liverworts. He has been an ideal author and very helpful friend.
